Behavioral Consultation Program

Helping Children with Autism
and Their Families:
Meeting the Need in Florida

www.devereuxfl.org

“Devereux has opened doors we once thought were not possible for our son! Thank You Devereux.”

Approximately one out of every 150 children is diagnosed with Autism, and ratios are even higher for children born with intellectual/developmental disabilities in general. The Behavioral Consultation Program provides the community with much needed services for children, adolescents and adults with developmental disabilities, mental health and behavioral disorders.

The program provides services utilizing the principles and techniques of Applied Behavior Analysis (ABA), teaching individuals appropriate behaviors, while reducing problem behaviors. Treatment is individualized and tailored to meet the needs of each individual. Parent/caregiver participation is actively encouraged such that they can be empowered to readily address problems when they occur.

The Behavioral Consultation Program relies on referrals from pediatricians, physicians, psychologists, school professionals, and most of all, through parents and professionals working with children with Autism.

Devereux Florida's Behavioral Consultation Program incorporates a full range of specialized behavioral services in the areas of:

Community Behavioral Consultation

- Specialized behavioral therapy services in the community such as in-home or in-school
- Provided by clinicians with board certification in Applied Behavior Analysis
- Services are provided to individuals with mental health and/or behavioral problems in need of specialized behavioral therapy
- Common behavior problems addressed include; defiance, tantrums, aggression, property destruction, self injury, disruptive behavior

Autism Program

- Applied Behavior Analysis services to children and adolescents with Autism in home, school or other community setting
- Services provided may include verbal behavior training, applied behavior analysis to address problem behaviors, skills training (social, communication, activities of daily living) and parent training
- Provided by behavior analysts with board certification or by trained behavior specialists supervised by a Board Certified Behavior Analyst

With a successful history in serving children and adults in residential settings with Applied Behavior Analysis (ABA) since 1987, Devereux Florida is expanding this expertise statewide to individuals and their families by providing ABA services in their homes, schools and communities.

Devereux' expansion of outpatient services coincides with the passing of the Steven A. Gellar Autism Coverage Act in May 2008 by the Florida legislature. This mandate requires large group health insurance plans and HMO large group maintenance contracts issued or renewed on or after April 1, 2009 to provide coverage for services provided to treat Autism spectrum disorders. These services include; Applied Behavior Analysis (ABA), Speech Therapy, Occupational Therapy, and Physical Therapy. Devereux is an experienced provider in the community, actively using Applied Behavior Analysis techniques with individuals across the Autism spectrum.

Devereux is accredited with the Joint Commission and adheres to high quality standards set forth by the national Devereux Foundation.
